

AYOKUNLE OMOTAYO

Software Engineer · Backend Specialist

Oshodi-Isolo, Lagos, Nigeria | ayokunle.omotayo01@gmail.com | linkedin.com/in/ayokunleomotayo | github.com/ayokunle-omotayo | ayokunleomotayo.com

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 4+ years of hands-on experience designing and delivering scalable backend systems, RESTful APIs, and full-stack web applications. Proficient in Node.js, Django (Python), and Laravel (PHP), with strong database expertise in MySQL and PostgreSQL. Demonstrated ability to take projects from concept to production — serving clients across fintech, healthcare, logistics, e-commerce, and energy sectors. Currently providing application support at United Bank for Africa (UBA), with a track record of delivering reliable, maintainable software solutions for both local and international clients.

WORK EXPERIENCE

Application Support Engineer | **United Bank for Africa (UBA)** | Lagos, Nigeria *Current Role*

- Provide first and second-line support for core banking and enterprise applications
- Diagnose, troubleshoot, and resolve software incidents within SLA timelines
- Collaborate with development teams to implement hotfixes and patch deployments
- Document incident reports, root cause analyses, and resolution procedures
- Monitor application performance and escalate critical issues to engineering teams

Freelance Backend Developer | **Self-Employed** | Lagos, Nigeria & Remote *2020 – Present*

- Designed and built RESTful APIs and backend services for 9+ production applications
- Delivered projects across fintech, healthcare, logistics, education, and corporate sectors
- Managed full project lifecycle: requirements gathering, architecture, development, deployment
- Worked with clients locally in Lagos and remotely with international stakeholders
- Maintained codebases, handled version control with Git, and provided post-launch support

KEY PROJECTS DELIVERED
